The Chief Executive Officer
Cassona Global Imaging
Accra.

Dear Sir,

A PROFILE OF THE PHFAoG FOR YOUR WEBSITE

Private Health Facilities Association of Ghana (PHFAoG) is an association of private health facilities nationwide offering different range of healthcare services to the good people of Ghana. With an assemblage of over **one thousand (1,000)** private health facilities across country and still growing, the association has a huge onus to ensure that its members are able to operate comfortably and confidently in a conducive environment by mitigating barriers, advocating for legislative reforms in favour of the private healthcare sector, supporting relevant stakeholders in health to achieve their mandate and strategically partnering local and global healthcare advocacy organizations and businesses among others.

Medical diagnosis globally is undergoing a revolutionary phase which requires the deployment of very powerful imaging technology to refine the basis of effective and precise medical treatment. Ghana is in desperate need of such imaging technology and the continuous lack of it will severely degrade the delivery of quality healthcare to the numerous healthcare seekers. Our key focus is to ensure accessibility to quality, cutting edge but affordable imaging technology to all private health facilities across Ghana as a viable endeavour to reduce the logistical deficit.

We are indeed exhilarated to be strategically collaborating with your reputable company, **Cassona** to help bridge the medical technological gap and advance the quality of healthcare in Ghana as we strive to become the country with the best healthcare system in Sub-Saharan Africa.

Yours faithfully

Aaron Nyamekye
Deputy General Secretary
